ABOUT PGSTEM HUB

We envision a community where STEM literacy is universal, diverse talents thrive, and students and residents of Prince George's County, MD, navigate pathways to cutting-edge careers—fueling local industries and empowering the next generation of innovators. The PGSTEM Hub is the central catalyst and connector for advancing K-16+ STEM education and workforce development across Prince George's County, MD.

MISSION

PGSTEM Hub fosters strategic partnerships among schools, businesses, higher education, and community organizations to provide accessible, engaging, and relevant STEM experiences. By expanding access to STEM career pathways and cultivating a sense of belonging, we equip residents with the skills to thrive in a rapidly evolving STEM landscape, fueling innovation and economic growth for generations to come.

PARTNER FEATURE - COLLEGE PARK ACADEMY

College Park Academy (CPA) serves students in grades 6 through 12. Our high school is ranked **#1** in Prince George's County and among the top five percent in Maryland. CPA's middle school is also number one in the county and among the top eight percent in the state.

In October, CPA students visited the U.S. Naval Academy to participate in its STEM Engagement program, a field trip made possible through a PGSTEM Hub connection. CPA is actively seeking partners to support internships and apprenticeships for our rising juniors and seniors. All high school students participate in one of our six signature programs. The signature programs prepare students with the skills and experience needed to thrive in all fields, including STEM. We invite organizations to partner with us to shape the next generation of innovators, scholars, and leaders. For more information, please contact our Director of External Relations Nicole Nelson at nicole.nelson@collegeparkacademy.org.
